

## LLW Series Linear Luminaires

### INSTALLATION INSTRUCTIONS

for all LLW Series Products

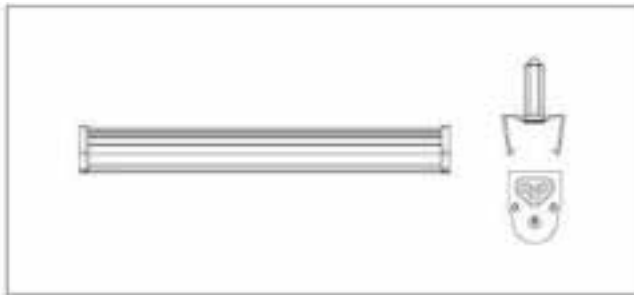

**WARNING**  
**RISK OF ELECTRICAL SHOCK**  
**IMPORTANT SAFEGUARDS**

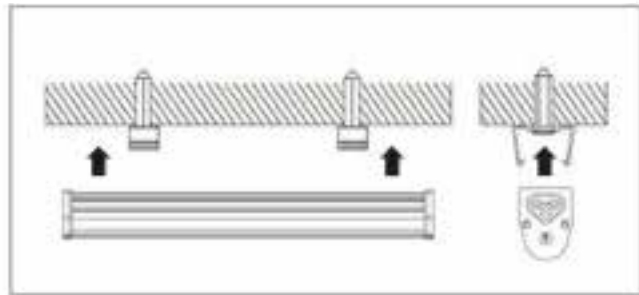

**READ AND FOLLOW ALL SAFETY INSTRUCTIONS.**

To ensure safety and rated lifespan, this product must be installed according to these instructions by qualified electrician only. Do not use this equipment for other than the intended use.

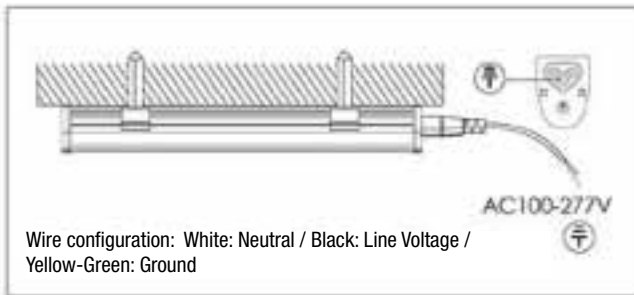

1. Secure supplied mounting clips to mounting surface using supplied hardware.

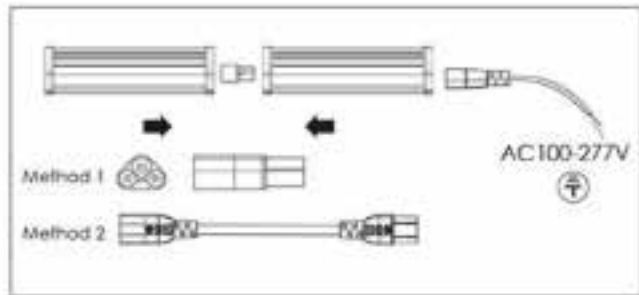

2. Secure LLW luminaire to installed mounting clips.

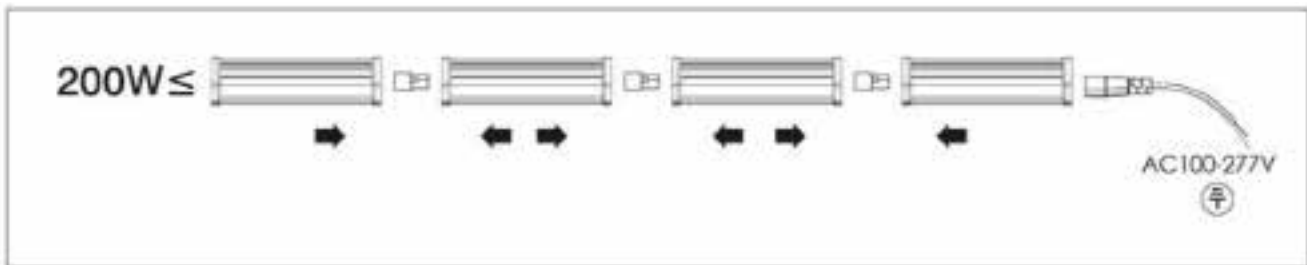

3. Disconnect or disable power on circuit. Wire power cable to circuit using supplied power cable with connector.

4. Repeat steps for each luminaire length or connect additional luminaires using supplied butt connector (method 1) or jumper cable (method 2).

Note: Combined wattage of connected luminaires should not exceed 200W. LLW luminaires are dimmable using Triac Phase Cut dimmer types only.

**WARNING:**

Risk of fire. Turn off power before installation.

Risk of electric shock. Installation should be performed by qualified electrician only.

The product is IP65 rated for use in damp or wet locations.

If this product exhibits irregular operation (buzzing, flicker, detectable heat or odor) turn off power immediately and contact a qualified electrician.
